

SHASHANKA PRAJAPATI

Senior Machine Learning Engineer

I am an experienced Machine Learning Developer with a great track record. I am a problem-solver that excels at logical thinking, maintains well-organized code to reduce technical debt, and is eager to learn new things. I am currently interested in learning MLOps and Software Architecture to improve my ability to productionize the models I build.

Education

Siddaganga Institute Of Technology

Bachelor Of Engineering In Computer Science

Karnataka, India

August 2013 - June 2017

- CGPA: 8.91

Work Experiences

Fusemachines

Kathmandu, Nepal

Senior Machine Learning Engineer

February 2021 - Present

- Co-Team Lead in a team of 7 on a Time-Series Forecasting project as a Consultant for a video game company, to forecast and optimize revenue through promotion planning
 - Automated the workflow and saved developers over two hours per day
- Team Lead in a team of 3 on a Supervised Learning project as a Consultant for a hospital to predict knee implants based on patient demographics
 - Analyzed over 23k surgery cases to build Regression and Classification Models that can predict knee implant sizes with over 90% accuracy
- Assistant Manager in AI Services, to monitor ML Engineers working on client projects on the company's behalf
 - Oversaw supervisory assignments for around 50 developers in the AI Services Department
 - Allocated ML Engineers to client projects by matching requirements with developer skills

Machine Learning Engineer

January 2019 - January 2021

- Team Lead in a team of 4 on recommendation and question difficulty classification features in Fuse Classroom, an online learning platform
 - Deployed services that were used by thousands of test takers across the globe
- Team Lead in a team of 3 on a Computer Vision project to extract tabular data from PDFs as a Consultant for a company that provides data transformation services
 - Implemented table detection and devised a novel method of extracting data from borderless tables that may be used to automate data collection
- Researched Python standardization and conducted a session with over 100 participants that resulted in company-wide improvements

Software Engineer

May 2018 - December 2018

- Consultant Developer on a Computer Vision project for an AI-based medical company to estimate a fit for 3D models of knees onto knee X-rays
 - Reduced best-fit search time from over 12 hours down to minutes by employing derivative-free non-convex algorithms, code optimizations, and vectorization
 - Implemented edge detection on the X-ray images before searching for the best fit

Integrated ICT / Semantro

Lalitpur, Nepal

Intern

December 2017 - May 2018

- Implemented a transliteration based Bilingual Search Service for Inventory Management

Projects

Sales Prediction Using Time-Series

Forecasting

Co-Team Lead August 2021 - Present

- Forecast game sales and optimize revenue through promotion planning
- *Tools:* Airflow, Amazon S3

Knee Transplant Size Estimation Via

Patient Demographics

Team Lead December 2020 - June 2021

- Predict implant sizes to optimize pre-surgery inventory management thereby reducing expenses
- *Tools:* Scikit Learn, Seaborn, Amazon Sagemaker

Standardization Of Python Projects

Lead Developer October 2020 - November 2020

- Research Python best practices to bring about a company-wide reform
- *Tools:* Poetry, Pre-Commit, Fire, Loguru, Dynaconf, Tox, Sphinx, GitHub Actions, GitHub Pages

Question Difficulty Estimation

Team Lead July 2020 - September 2020

- Classify question difficulty to bring uniformity in quizzes
- *Tools:* Elasticsearch, NLP, Amazon SQS, Flask

Resource Recommendation System

Team Lead April 2020 - September 2020

- Recommended resources to read on getting a question wrong on a learning platform to help students improve
- *Tools:* Elasticsearch, NLP, Amazon SQS, Flask

PDF Table Extraction

Lead Developer September 2019 - April 2020

- Extract tabular data from PDFs of scientific papers for data compilation
- *Tools:* Detectron2, Camelot, PDFMiner

Knee Transplant Size Estimation Via

Medical Imaging Techniques

Developer July 2018 - September 2019

- Predict implant sizes to optimize pre-surgery inventory management thereby reducing expenses
- *Tools:* Kabsch, NLOpt, Scikit Learn

Bilingual Inventory Management

Developer December 2017 - May 2018

- A transliteration based search mechanism with support for Nepali and English to optimize local store inventory management
- *Tools:* Lucene, NLP, Scala, Maven

Sentiment Analysis

Developer September 2016 - March 2017

- Sentiment Analysis on Amazon reviews
- *Tools:* NLP

Undergraduate Major Project: Voice

Assistant

Developer September 2016 - March 2017

- A simple interactive personal assistant for Linux distributions
- *Tools:* NLP

Blogging Website

Developer June 2016 - July 2016

- A simple blogging web app powered by Ruby on Rails

Undergraduate Mini Project: Online

Examination System

Developer February 2016 - June 2016

- A web application for online examination with Multiple Choice Questions

Certificates

First Nepal Winter School In AI

NAAMII

December 2018

CSMM.101x: Artificial Intelligence (AI)

ColumbiaX

May 2018
